FAGA 1ST INTERNATIONAL FUNCTIONAL COSMETIC GYNECOLOGY CONGRESS

INVITATION

Dear Industry Partner,

I am pleased to announce our FAGA 1st International Functional Cosmetic Gynecology Congress, which will be held on 12-14 June 2025.

As you know, Cosmetic Gynecology has become one of the fastest-growing and most in-demand gynecological application fields among physicians, especially over the last decade. At this point, nearly all obstetricians and gynecologists show interest in this field in one way or another. Particularly office-based physicians have found many procedures they can perform in their clinics within this field, which has opened a new professional dimension for them.

FAGA (Female Aesthetic Genital Academy), which I founded and direct, is an educational institution that has been regularly organizing internationally accredited CME-certified courses twice a year in Turkey, and periodically in Azerbaijan, Romania, Georgia, Dubai, Egypt, Iraq, and Germany since 2017. The number of physicians who have graduated from our courses has exceeded 800. Today, FAGA—together with its eight experienced national and international trainers—has become one of the leading institutions in its field.

Based on our eight years of domestic and international experience, we decided to organize a congress in line with international standards, focusing solely on functional cosmetic gynecology and its related subtopics, evaluating each subject in greater depth instead of covering many subjects superficially. By strictly adhering to the principle of merit, we planned a congress open to all domestic and international participants, where 35+ internationally recognized foreign speakers and 15+ Turkish speakers will share their expertise in detail. Our congress will be accredited with CME credits by international accreditation bodies; therefore, the official congress language is English, and simultaneous translation into Turkish will be provided.

Dear Sector Representative, your participation in this congress is particularly important for two reasons:

First; the majority of the foreign speakers attending our congress are globally recognized leaders in cosmetic gynecology, with their own discoveries, publications, and books in this field. This will attract Turkish physicians who wish to advance their knowledge and experience in cosmetic gynecology, offering a significant opportunity and a unique value. Through this, you will have the chance to present your products to a large number of Turkish physicians and develop a new professional network.

Second; due to the international nature of the congress—with both its speakers and participants—there will be a great opportunity not only to meet, connect, and even perform direct sales to many foreign physicians, but also for Turkish manufacturers to acquire new international distributorships.

On the other hand, the high number of congresses organized in our country, the significantly high sponsorship fees, and the considerable portion of congress costs being placed on companies force sponsoring firms to be highly selective. Moreover, when companies do not receive the expected return from the congresses they sponsor, the situation becomes even more challenging.

Considering all these factors, we have prepared a sponsorship dossier for the FAGA 1st International Functional Cosmetic Gynecology Congress with equal rights for every company under each sponsorship category, allowing you to participate under the most favorable conditions. We believe that the special elements we have prepared—ensuring that almost all participants visit your stands—will make this congress truly unique. We would be pleased to welcome you among us and contribute to opening new international doors for your company.

Sincerely,

Dr. Özgür Leylek
Congress President
